Transportation Costs:

For a student using two SEPTA tokens each way, transportation to our school year program costs \$8.00 per Saturday, or a total of about \$120 for the school year. For our summer program, the same student would pay about \$150.

Every parent that is able to bring their child to and from Breakthrough or pay for the cost of SEPTA transportation themselves saves the organization \$270 per year that we are able to put back in to better programs and resources.

If you need support with the transportation costs to and from program, please complete the following financial aid application, located here:

<https://form.jotform.us/mleisman/btphillytransportation>

- I intend to apply for financial aid for transportation
- We will not be applying for financial aid for transportation.

Are there any other transportation related issues or concerns you would like us to know about?
